Storage Box**

INSTRUCTIONS

Assemble raw unit and mark which edges need colouring. Colour these edges with the Smoke fusion pen. Cover both sides of the three shelves in WHEEL ALIGNMENT (reverse). Cover also the inward facing sides of base, sides, back and top.

Cover the remaining sides of top, back and both side pieces in TOOL BOX (reverse). Cut two 10cm (4") wide strips of TYRE SHOP. Adhere these to the top (trim excess) and the back pieces, ensuring these line up neatly once assembled. This should hid the paper loin on the top piece. Assemble and glue unit together.

Cover three drawers in WHEEL ALIGNMENT (reverse) and three more in GAS TANK. Cover remaining six drawers in TYRE SHOP.

Affix metal case handles to three of the TYRE SHOP drawers and position on bottom shelf. Cut 1cm (1/2") strips of Licorice cardstock. Use Dymo stickers on these strips to label drawers, trimming to fit bookplates and label pulls.

Arrange these drawers as desired in unit, then affix label pulls (with sticker labels adhered in place) to the three drawers on the second-lowest shelf. Affix the bookplates and labels to the remaining drawers and cut out the semicircle so they can open easily.
